

# LA GRANADELLA ROUTE

Although the first 2 km of the route pass through an urban zone, the majority of this route is located in the **Monte Público de la Granadella**. It has an astonishing landscape among pine woods and Mediterranean shrub land and transports us to a famous but little known zone of **Xàbia**. A total of four scenic viewpoints, two green zones, public mountain land, a cove and two towns are connected by this route which is blessed with breathtakingly beautiful landscapes and picturesque spots.

## DESCRIPTION:

Its 21 km route involves a degree of physical effort, especially in the 500 m section of **Camí Vell de la Granadella** until it reaches the watchtower. The route through the park is not especially difficult since it is a forest trail. We recommend that you stop for a rest and snack in the cove: **Cala de la Granadella**. The return trip by road from the cove is not long so you can spend some time enjoying the lovely view from the **Mirador del Castell de la Granadella**.

### Departure and Arrival:

Parking del Arenal (Canal de la Fontana)

### Distance:

23,7km.

### Travel Time:

3 hr. 45 min.

### Accumulated Ascent Level

Difference: 551,1m.

Difficulty Level: High.
